Project Name:  
Savy Student

Project Description:  
The Savy Student program is a subsidy provided by the student fee to dining services which allows us to offer all students a complete lunch meal every Wednesday for only $3.00 at any of our 15 dining locations.

This program was initiated Fall 2008 as a method to create a program that would provide students with a consistent reminder that the student fee has been responsive to the results of the survey and provides services that directly benefit the students’ funding the fee.

Student Priorities:  
This year we again find that the results of the survey indicate that a majority of students would like to see “increased food variety and more competitive prices at on-campus dining locations”. Continued support of this program would directly address this student need and our hope is to provide this as a continual opportunity for the next 3 years.

Anticipated Impact:  
30,678 Savy Student meals were sold, redeeming $110,523 student fee dollars in our first semester of the program. Our numbers this second semester of the program have already increased and we have received approval to prepared to reallocate fee dollars from other union allocations to cover the expected overage.

The expected continued growth of usage of the Savy Student program together with expected increases in cost of goods (3% annually), we estimate the student fee amount needed to be:

$320,000 for 2009 - 2010
$330,000 for 2010 – 2011
$340,000 for 2011 – 2012

As these numbers are estimates, any unused fee funding would be returned to the Student Fee budget each year.
